HOW IT WORKS?

Nationwide Route Requests

The central system automatically routes your request to the relevant state systems. You enter your start and destination — everything else happens in the background.

- 1 Enter Start & Destination**
Address-level precision anywhere in Germany, with intermediate stops
- 2 Calculate Partial Routes**
Each state calculates its own section along themed routes
- 3 Adjust Route and Start**
Overview map, detailed view per state system, GPX export

WHO WE ARE?

Radroutenplaner Deutschland

Planning a multi-day cycling tour across several federal states? That's exactly what Radroutenplaner Deutschland is for.

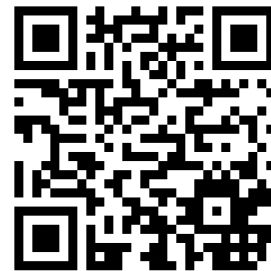

Several federal states have joined forces in a collaborative project to enable cross-border, large-scale cycling route planning. Radroutenplaner Deutschland brings the individual state route planners together in one central application — for seamless planning from the North Sea to the Alps.

Key Benefits

- ★ Routing along premium paths
- 🗺️ Cross-border routing
- 🔒 Full, unrestricted access to all state-level features

New

Available on Smartphone
